

Sai Siri Reddy

Hyderabad, Telangana | +91 8331879171 | saisirireddy27@gmail.com
linkedin.com/in/pathuri-siri-reddy | github.com/sirireddy

Summary

Computer Science Engineering student with experience in full-stack development, machine learning, data analytics, and software engineering. Skilled in Python, Java, SQL, React, Flask, and database technologies, with a strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Computer Networks. Developed AI-driven applications, analytics platforms, and scalable software solutions to solve real-world problems through technology and data-driven decision-making.

Education

Malla Reddy Engineering College for Women , Hyderabad	2023 – 2027
B.Tech in Computer Science Engineering	CGPA: 9.02/10

Experience

Data Science Intern KODBUD	Remote 2026
-------------------------------------	---------------

- Processed and analyzed datasets containing **10,000+ records** using Python (Pandas, NumPy).
- Created **5+ data visualization reports** to extract insights and support decision-making.
- Built data-driven applications, machine learning models, and database systems using Python, Java, and SQL by applying structured problem-solving and analytical reasoning.

Projects

Leaf Disease Detection using Lightweight ResNet

- Developed a deep learning-based plant disease classification system using a Lightweight ResNet architecture.
- Applied attention mechanisms and image preprocessing techniques to improve feature extraction and classification performance.
- Trained and evaluated the model on 1000+ plant images using TensorFlow/Keras and OpenCV.

Spam Guard

- Developed an NLP-based spam detection system for SMS and call message classification using machine learning techniques.
- Implemented TF-IDF vectorization and text preprocessing to transform unstructured text into meaningful features.
- Trained and evaluated classification models on a dataset of 5000+ messages using Scikit-learn.

InsightFlow – User Behavior Analytics & Heatmap Platform

- Developed a full-stack analytics platform to track page views, clicks, and user sessions across web applications.
- Built REST APIs and MongoDB-based storage for event collection, session analysis, and user journey tracking.
- Designed an interactive React dashboard with session analytics and click heatmap visualization.

JobShield AI – Explainable Fake Job Detection & Recruitment Fraud Analysis Platform

- Developed a full-stack AI platform to detect fraudulent job postings using NLP and machine learning techniques.
- Built a React and Flask application for real-time job analysis, fraud detection, and risk scoring.
- Implemented Explainable AI (XAI) techniques to provide transparent prediction insights and improve trust in model decisions.

Technical Skills

Programming Languages: Java, Python, C, JavaScript, SQL

Web Technologies: HTML, CSS, React.js, Node.js, Flask, REST APIs, Backend Development, API Development

Cloud & Backend Exposure: AWS (EC2, S3), Cloud Computing Concepts, Backend Development, REST APIs, Flask, Node.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, TCP/IP, Routing & Switching, VLANs, Subnetting, OSPF, BGP, Network Security Fundamentals

Data Science & ML: Pandas, NumPy, OpenCV, Machine Learning, Deep Learning, NLP, Feature Engineering, Data Preprocessing, Model Evaluation

Soft Skills: Problem Solving, Collaboration, Analytical Thinking

Certifications

- Cisco Networking Academy – Introduction to Networks (CCNA)
- Cisco Networking Academy – Enterprise Networking, Security & Automation
- Cisco Networking Academy – Networking Essentials
- Cisco Networking Academy – Cybersecurity Essentials
- Cisco Networking Academy – Python Essentials 1
- Cisco Networking Academy – Python Essentials 2
- Cisco Packet Tracer Certification
- IBM SkillsBuild – Artificial Intelligence Fundamentals
